Deactive GYMS LIMITED

CHILDRENS OUTDOOR GYM EQUIPMENT

GYMS LIMITED

At Be Active Gyms, we ensure that our customers have our full attention. When you call our Northampton team, we'll be able to talk to you about our supply of children's fitness products, our installation process, and the technical information for each piece of equipment.

All our equipment is fully designed in the UK by ex-military aerospace engineers and fully qualified RPII inspectors.

The equipment is designed to exceed the standards of BS EN 16630. The equipment is fully galvanised, and powder coated and comes with a 25-year structural Guarantee, 5-year paint Guarantee and a 2-year moving parts Guarantee, subject to terms and conditions which are available on request.

That's because we know that safety standards come first. To ensure proper use, we provide labelling for the use and weight loads of every piece of equipment. Every piece of equipment is labelled for this explicit purpose.

Furthermore, we prevent crushing, catching, or squeezing with a safety stop system. Playground and gym accidents are all too frequent with misuse. With the proper safety systems, you can reduce mishaps in your community.

Speak with our team of professionals to get a quote on your next outdoor gym equipment installation. We can help you create a healthier community today in Northampton, and further afield.

Prices based on installation into existing grass. Artificial grass, tarmac and wet pour repairs are priced accordingly.

Plus delivery at 6% of total price excluding waste removal

All bundles require waste removal at £350+vat, unless waste can be lost on site and within 15m from install location.

Arm and Pedal Bike

Separate arm and leg functionality creates a whole body motion involving coordination and flexibility.

Horse Rider

This advanced version of a rocking horse creates a whole body exercise and centres on coordination and balance.

Tai Chi Discs

Circular movements of these discs test arms and shoulders while involving coordination and social interaction

Double Strength Challenger

This competitive and fun tool assists with arm and shoulder stretches, creating important socialisation skills.

Leg Stretch

This simple warm up tool to help children increase their flexibility and balance and provide social engagement.

Double Health Walker

Supports two users as they stride in place for a tandem use of balance, flexibility, cardio, and social interaction.

Double Slalom Skier

Students can learn balance, coordination, and flexibility with tandem leg movements while achieving a light cardio workout.

Sky Walker

Children can focus on coordination while creating a full body movement and can be used for light cardio.

Double Sit Up Bench

Facilitates social interaction and can be used for exercises like sit ups and leg raises to help build muscles.

Waist Trainer

This easy to use apparatus can be used as a warm up, to help enhance coordination and balance for school children.

Rower

Children can get great cardio workouts from this classic gym tool which relies on resistance and tension.

Surfacing

Not only do we provide high quality outdoor exercise equipment but we also provide a wide range of surfacing options to suit your needs.

"We're all really happy with our new gym equipment, pupils are really benefitting from using them at playtimes both in terms of increasing physical activity and social skills, they have enjoyed them from the start, we've used them as part of PE lessons and also as a strategy for reward time.

Be active gyms were easy to work with and installation was quick and simple."
